SUMMARY

Final-year BCA student specializing in Cloud Computing with hands-on experience in AWS, DevOps, and serverless architecture. Head of the Quantum Club, leading workshops in emerging technologies. Actively building production-grade DevOps projects using Docker, Jenkins, Terraform, and CI/CD pipelines.

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, JavaScript (ES6+), React.js, Next.js
- **Backend:** Python, Java, Node.js, AWS Lambda (Serverless)
- **Cloud & Infrastructure:** AWS (EC2, Lambda, S3, RDS, ECR, API Gateway, DynamoDB, Textract, Cognito, CloudWatch, IAM, VPC), AWS CLI
- **DevOps & Tools:** Docker, Jenkins, Terraform, GitHub Actions, CI/CD Pipelines, Bash/Shell Scripting, Linux
- **Databases:** MySQL, MongoDB, Amazon DynamoDB, PostgreSQL
- **Concepts:** Git, GitHub, REST APIs, WebSockets, Serverless Architecture, IaC, DevSecOps (Bandit, Checkov, OIDS)

EXPERIENCE / INTERNSHIPS

AWS Cloud Intern - F13 Technologies

November 2025 – February 2026

- Led a team of 4 members to create and deploy company-based AWS projects.
- Trained on core AWS services including EC2, S3, IAM, VPC, CloudWatch, and Lambda.
- Working towards completing required AWS Certifications as part of the internship program.

Machine Learning with Python Intern - Vaishnav Technologies

June 2025 – July 2025

- Developed Python-based mini applications using OOP and modular programming.
- Performed EDA on real datasets using Pandas, NumPy, Matplotlib, and Seaborn.
- Completed two projects: Movie Ticket Booking System and COVID-19 Data Analytics.

ACADEMIC PROJECTS

CI/CD Pipeline with Jenkins, Docker & AWS ECR | *Jenkins · Docker · EC2 · ECR · GitHub Webhooks*

- Built a production-style CI/CD pipeline that auto-deploys a Next.js app on every GitHub push.
- Provisioned two EC2 instances (Jenkins server + App server) via AWS CLI with IAM roles for credential-free ECR access.
- Configured Jenkins pipeline with 5 stages: Checkout → Test → Docker Build → Push to ECR → SSH Deploy to App EC2.
- Resolved real-world issues: Jenkins WAR installation workaround for GPG key failures, swap space fix for OOM crashes, Elastic IP for stable server addressing.

Infrastructure as Code — Terraform on AWS | *Terraform · VPC · EC2 · RDS · S3 · Remote State*

- Provisioned complete AWS infrastructure (VPC, public/private subnets across 2 AZs, EC2, RDS PostgreSQL 15, S3) using Terraform modules.
- Configured S3 remote state backend with versioning — infrastructure state never tied to local machine.
- Structured project into reusable modules (vpc, ec2, rds, s3) enabling environment replication by changing a single variable.
- Debugged real AWS constraints: RDS subnet group requires 2+ AZs, PostgreSQL reserved username restrictions, partial state recovery after failed apply.

AI Recruiter Portal | *AWS · Python · React.js · SQS · Lambda · Textract*

- Architected an event-driven serverless pipeline using S3, SQS, Lambda, API Gateway, and DynamoDB to automate resume parsing and candidate scoring.

- Resolved production issues including Lambda import errors, SQS routing conflicts, duplicate trigger elimination, and CORS misconfigurations.
- Deployed frontend on AWS Amplify with Git-based CI/CD; maintained observability using CloudWatch Logs.

Cloud-Native URL Shortener (SnapLink) | *AWS Lambda · API Gateway · DynamoDB · Next.js*

- Built a fully serverless URL shortener on AWS free tier with link creation, 301 redirects, and real-time click tracking.
- Designed a RESTful HTTP API with 3 endpoints using API Gateway v2 with CORS and IAM least-privilege roles.
- Deployed and configured entire backend infrastructure via AWS CLI without using the console.

LEADERSHIP

Head — Quantum Club - Kristu Jayanti Deemed University March 2025 – Present

- Leading 150+ members conducting workshops and sessions in Quantum and emerging technologies.
- Mentoring junior students on learning roadmaps, AWS fundamentals, Git, and project development.

CERTIFICATIONS & LANGUAGES

- IELTS Band 7
- AWS Academy: Machine Learning Foundations
- AWS Partner: Accreditation (Technical), Containers on AWS, Generative AI Essentials, Cloud Economics, Migrating Workloads to AWS, Digital Sovereignty on AWS
- IBM SkillsBuild: Getting Started with Artificial Intelligence
- Infosys Springboard: Python Foundation

EDUCATION

Bachelor of Computer Applications (BCA) — Cloud Computing - Kristu Jayanti University (Deemed-to-be), Bengaluru 2023 – 2026 (Expected)
